Roofing components

DRY RIDGE SYSTEM

Figaroll® Plus

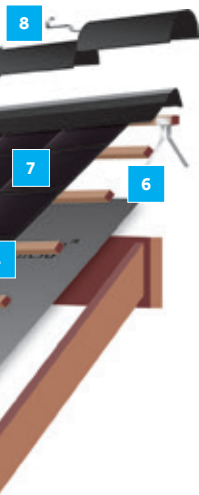

Ridge tree

Kro & ridge clip

Dry vent monoridge system

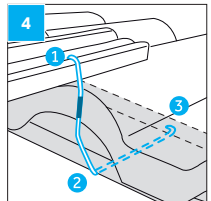

Concrete tiles

Clear tile
(Translucent)

Eave filler / comb
Prevents access of birds and mice, and facilitates airflow.

Innofix Clip
Securing roof tiles to prevent wind-upliftment.

UNDERLAYS

Radenshield™ aluminium membrane

WATERPROOFING

Easyflash®

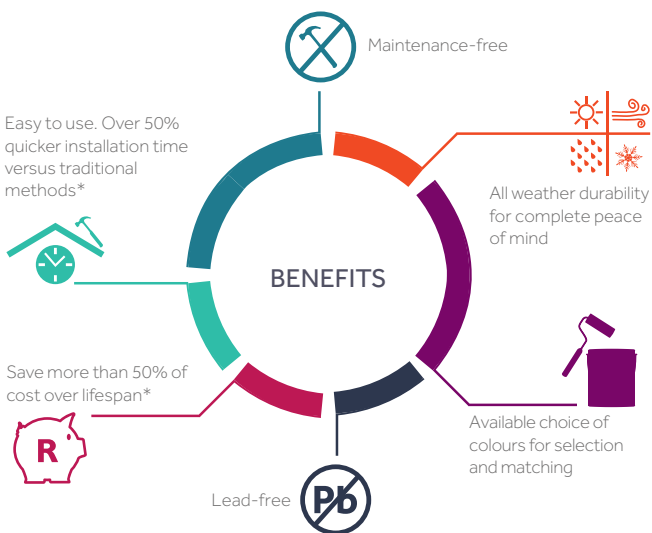

Undertile membrane

Wakaflex

ON TILE FLASHING / WATERPROOFING

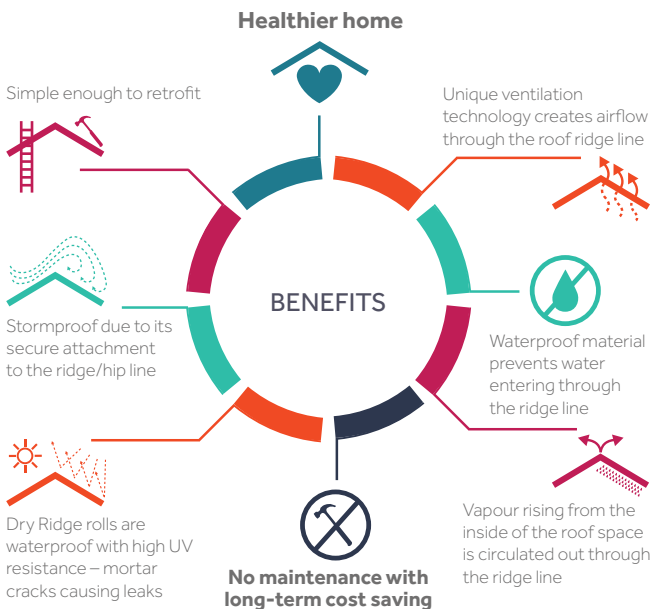

Easyflash® is a simple, effective waterproofing solution for roof tile-wall junctions, e.g. chimneys.

* Based on analysis with 50 merchants and truss manufacturers

DRY-FIX, LEAK-PROOF RIDGE SYSTEM

Renovating or building? Consider the alternative to mortar ridges. BMI Coverland Dry Ridge System is a leak-proof, maintenance-free solution for your roof ridge and hip-lines.

HUMIDITY COMFORT

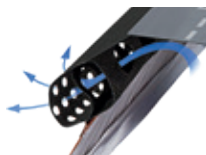

A high-performance dry ventilation solution that protects the roof infrastructure against humidity to create a comfortable indoor ambiance.

Benefits

Unique ventilation technology

Double ventilation channels allow ventilation on the ridge line with the new double-duct "labyrinth ventilation technique".

Durable and long lasting

The stretchable aluminium and PET foil compound with high UV-resistance provides a highly durable and long lasting solution.

See the easy time-saving application of the Dry Ridge Rolls on YouTube.

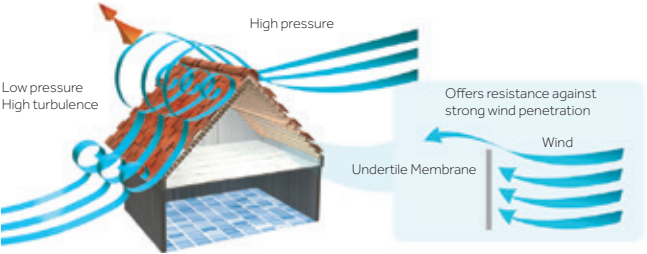

MOISTURE, WIND AND DUST BARRIER

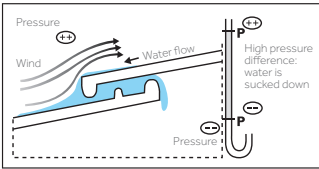

Functions as a high-end alternative to plastic which offers superior resistance to harsh weather conditions. It is 100% UV stable for use in buildings in hot climates.

Benefits

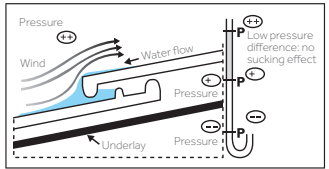

Superior wind uplift strength

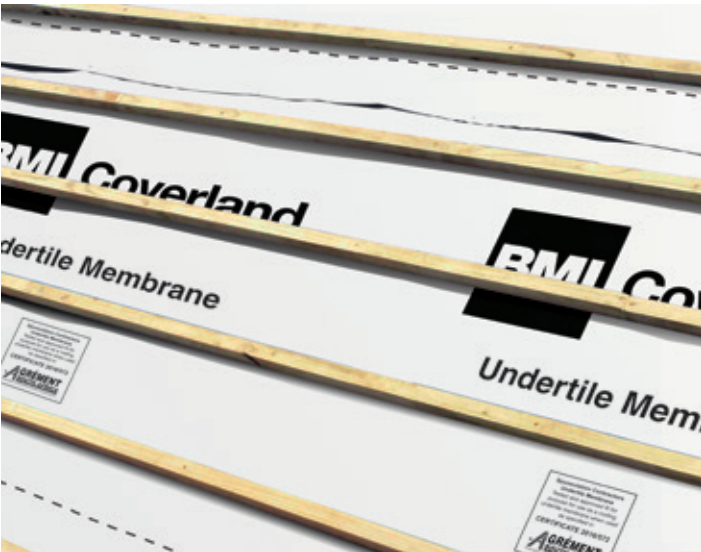

Increased water-tightness

Without underlay

With underlay

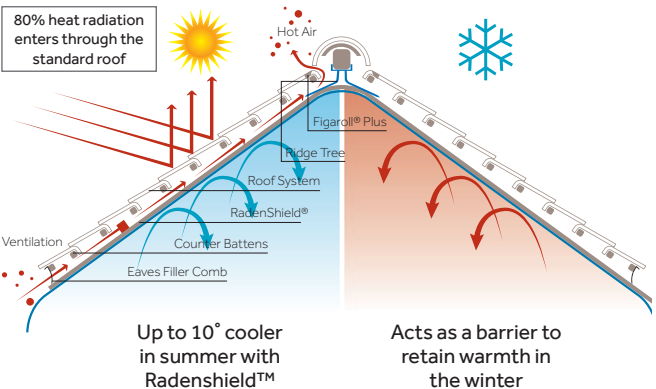

CLIMATE AND COST CONTROL

BMI Coverland Cool Roof System is a self-sustaining system that offers a solution to reduce the flow of heat transfer by optimising the roof's thermal performance.

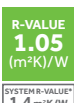

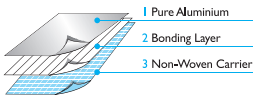

Components of the Cool Roof System

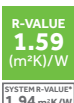

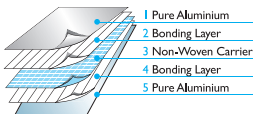

COOLER HOME

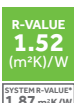

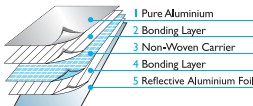

Radiant barriers function as high performance roof underlays and provide the added benefit of a reflective insulation material. It aids indoor climate comfort when combined with the components of the Dry Ridge system. See R-Value for compliance with SANS 204 Energy Efficiency in Buildings.

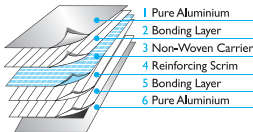

Size: 30 Lin.m x 1.5 Lin.m
Effective Coverage: 40.5m²

Size: 30 Lin.m x 1.5 Lin.m
Effective Coverage: 40.5m²

Size: 30 Lin.m x 1.5 Lin.m
Effective Coverage: 40.5m²

Size: 33.33 Lin.m x 1.5 Lin.m
Effective Coverage: 45m²

*System R-value = product r-value + 0.35 where 0.35 m²K/W represents the roof tiles and standard plasterboard with 40mm gap above the foil and 60mm gap below. The system r-value is a guide and should be professionally verified based on the actual roof application process.

Coverland

BMI Group was born out of a recognition that customers now expect a single point of expertise to help them find their ideal roof. Bringing together some of the industries most trusted brands to become the largest supplier of both flat and pitched roofing and waterproofing solutions throughout Europe, BMI Group has over 165 years of experience and innovation to offer its clients.

As a Standard Industries company, BMI Group, headquartered in the UK, has the support, reach and resources of a global enterprise. With over 120 production facilities across Europe, Africa and Asia, and more than 9,500 employees worldwide, the business is well positioned to provide an unparalleled level of service to homeowners, specifiers, contractors, property owners and developers.
